BTC/USDT	BUY	\$78819.98	\$78819.98	\$+135.30	WIN

Technical Remarks & Strategy Analysis

Weekly Summary: The bot achieved a 75% overall win rate across ICT Fair Value Gap (FVG) and Order Block confluence setups. Forex/Gold market closure over Saturday and Sunday resulted in zero weekend slippage. Losses occurred primarily during high-volatility news expansion periods where stop losses were swept before direction resumed. **Recommendation:** Maintain 80% confidence filter for market sessions.
